

Immunology 3E

Essential and Fundamental

By (author) **Sulabha Pathak**

Homi Bhabha Fellow, Department of Biological Sciences, Tata Institute of Fundamental Research, Mumbai, India

By (author) **Urmi Palan**

Dept of Microbiology, R. Ruia College, Mumbai, India

450pp., £45.00 / \$80.00

ISBN 978 1 848290 334 (Paperback)

Publication: 1st July 2011

KEY SELLING POINTS

- * Updated 3rd edition of a successful text
- * Now full colour throughout
- * Cultural real-life applications as well as scientific fact

THE BOOK

Immunology is the study of all aspects of the host defence against infection challenge, including the adverse consequences of such defence mechanisms. It is a broad ranging discipline that touches almost all aspects of human health and well-being.

"Immunology: Essential and Fundamental 3E" is the new edition of a text that teaches the ideas and concepts of immunology as well as the facts and the detail. It encourages students to question the obvious and explore the implications of the material they learn.

This new edition is now in full colour throughout, and maintains its pedagogic impact: sidebars present real-life applications, clinical uses or research material for the interested reader; metaphors and song lyrics link the content to popular culture and daily life, thus enabling the student to think beyond the course parameters and about the overall importance of immunology; and the wide margins, boxes, tables and diagrams ensure that the format is attractive and easy to read.

For the first time "Immunology: Essential and Fundamental 3E" will have a companion website to offer additional information and to enhance the understanding of the subject. The reader of this book will appreciate the knowledge gained from it, and also the pleasure enjoyed whilst doing the reading.

CONTENTS

1. Introduction 2. Innate Immunity 3. Complement 4. Entities of Adaptive Immune Response: Immunogens 5. Entities of the Adaptive Immune Response: The Lymphoid System 6. Molecules of Adaptive Immune Recognition: Lymphocyte Receptors 7. Molecules of Adaptive Immune Recognition: Antigen Presenting Molecules and Antigen Presentation 8. B Lymphocytes 9. T Lymphocytes 10. Humoral Immunity 11. Cell-Mediated Immunity 12. Immune Tolerance 13. Infections and the Immune System 14. Cancer and the Immune System 15. Autoimmunity 16. Hypersensitivity 17. Transplantation and Transfusion Immunology
